

INJECTION

>>>>> **IRP** Cert by German Concrete and Construction Engineering Association

INJECTION SYSTEMS

There are many ways in injection technology, so a consultation can not be replaced by an authorized specialist. A rough overview of the many possibilities and application areas can be found in this flyer.

For detailed information about the powerful injection materials and different processing techniques, we advise you. The Bögershausen Bau GmbH is an experienced partner in the planning and execution of all applications in the injection area.

INJECTION MEASURES

- crack injection
- gelling/Structural Waterproofing
- foundation Engineering
- microtunneling
- concrete slab lifting
- solidifying masonry and building ground
- joint sealing/adit driving

Properties

- filling
- bonding and gluing
- gelling respectively certain injection
- stabilizing
